Syracuse University-Tohoku University (SU-TU) Joint Forum on Energy and Environment
Monday, April 11, 2016 1:45p to 5:15p
SyracuseCoE Headquarters
Syracuse, NY

FULL PROGRAM | REGISTER

Energy use and supply is of fundamental importance to society and has made the greatest impact on the environment of any human activity. It has now become one of the major political issues of our time and the subject of international debate and regulation. For this reason, there is an important call for international collaborations dedicated to energy and environment issues.

Syracuse University and Tohoku University have significant investment and development in academic research, education, and extension programs and are internationally known for their contributions to the field of energy and environment. Both universities have established their own energy centers, SyracuseCoE and Innovative Energy Research Center (IER), to enhance their impact in the field of energy and environment.

This forum discusses the research, development and demonstration of energy and environmental systems and looks at innovative solutions to common challenges. Join us for the Syracuse University - Tohoku University Joint Forum on Energy and Environment which will encourage and facilitate academic exchange among faculty members and students and create opportunities for cross-discipline collaboration.

Chairs:

**Dr. Jeongmin Ahn**, Department of Mechanical and Aerospace Engineering, Syracuse University

Prof. **Kaoru Maruta**, Institute of Fluid Science, Tohoku University
